jigneshmotwani.github.io/portfolio

Full-stack and AI engineer who likes building tools that empower developers, automate workflows, and scale real-world applications.

EXPERIENCE

AI Engineer · Keppel Technology Solutions — Jan 2026 – Present
- AI Engineer at Keppel Technology Solutions, the technology arm of Keppel.

Backend and Infra Engineer · Kiora Care — Sep 2025 – Dec 2025
- Backend and infrastructure engineering for Kiora Care.

Undergraduate Teaching Assistant, Algorithms · SUTD — Jan 2024 – Apr 2025
- Teaching assistant for the 50.004 Algorithms module with 300+ students.

Full Stack Algorithms Engineer · FireJet — May 2024 – Sep 2024
- Enhanced the Figma-to-code engine by refining backend logic and adding React Native support, contributing to the platform's growth from around 30,000 to 60,000 users.
- Developed and optimized the Figma-to-Code converter, implementing one-click design-to-code transformation using TypeScript and Node.js.

Software Engineer Intern · pQCee — Aug 2023 – May 2024
- Sole developer of QuantumNFT, a "Kaggle for quantum programming": built everything from the API and database architecture to blockchain integration via Web3 and MetaMask.
- Spearheaded end-to-end development of QuantumNFT, a Web3 platform on Bubble where developers showcase skills through NFT-based quantum coding challenges.

Research Assistant, Hand Gesture to Speech Conversion Glove · SUTD — Aug 2023 – Dec 2023
- Worked on a glove that interprets hand gestures into real-time speech to support people with speech impairments.

Student Intern · Sony Electronics Asia Pacific — May 2022 – Sep 2022
- Supported Sony's new global SAP implementation and web analytics rollout.
- Took part in Harmonization / BPR activities with Sony companies for the new global SAP system implementation.

SELECTED PROJECTS

ROSS · Permission-aware enterprise knowledge assistant — GitHub/Tencent-AI-2026
Budwood · Version control for huge, busy monorepos — GitHub/Bud
Live Sign-Language Translator · Real-time sign language to text and speech — GitHub/Sign-Language-to-Text-Translator
Chord File Sharing · Peer-to-peer file sharing on the Chord protocol — GitHub/File-Sharing-System-Chord-50.041

SKILLS

Languages	TypeScript, JavaScript, Python, Java, C, C++, Go, Rust, SQL
Frontend & Mobile	React, React Native, HTML/CSS, Tailwind CSS, Android
Backend & Data	Node.js, FastAPI, PostgreSQL, Supabase, Firebase, SQLite, REST APIs
AI & ML	LLM applications & agents, Azure AI Foundry, Azure AI Studio, MCP, LiteLLM, Machine learning, Computer vision, NLP
Cloud & DevOps	Microsoft Azure, AWS, Supabase, Firebase, Docker, OpenTelemetry, Grafana, Git
Also worked with	Web3 & MetaMask, Bubble, SAP, Adobe Analytics, Figma API

EDUCATION

SUTD — 2021 – 2025
Bachelor of Engineering, Computer Science and Design, Minor in AI

Narayana Junior College — 2019 – 2021
Higher Secondary Certificate (Maharashtra HSC Board), Computer Science · Graduated with a 98% grade.

Global Indian International School — 2013 – 2019
CBSE 10th, PCM Computer Science

CERTIFICATIONS & AWARDS

Microsoft Certified: Azure AI Apps and Agents Developer Associate
AWS Certified Generative AI Developer – Professional, Amazon Web Services
AI4I® – Literacy in AI, AI Singapore — 2022
Undergraduate Merit Scholarship, SUTD — 2021–2025
IdeateSomething 2021, Winner — 2021
Best Machine Learning Project Award, SUTD — 2022
Honourable Mention, Singtel x SUTD Information Systems & Programming Merit Award, SUTD × Singtel — 2022
